LEADING PERFORMANCE ON THE WATER

STE'GAL Dock Systems®

Whether your application is Commercial Marina, Community Dock, or Private Dock, **superior quality is at the heart of every one of our STE'GAL Dock Systems®.**

Built around a welded hot-dipped galvanized steel truss frame engineered for optimum strength and stability and fabricated by craftsman of unmatched experience, **our Dock Systems are built to stand the test of time with minimal maintenance.**

We offer a range of standard and custom design solutions to fit even the most challenging needs.

Reasons to own a STE'GAL Dock System®:

- **Initial and life-of-ownership cost values**
- **Low maintenance**
- **Exceptional service life**
- **Standard or fully customized configurations**
- **Finish options: HD galvanized or painted**
- **Flotation options: fully encased is standard**
- **Full accessory line: built-in and bolt-on**
- **Decking options: wood, concrete, and composite**

Please call or visit our website for more information.

THE STANDARD SINCE 1985

The Original OZARK BOAT LIFT®

Often imitated but never duplicated. With over 7,300 installations and designed to exceed both initial and life-cycle ownership value expectations, the OZARK Boat Lift® is the proven solution to protecting your investment—from Personal Watercraft to 34-foot, 15,000-pound Cruisers.

Designed for boat-owners with dock owners in mind

Maximize your craft's performance and longevity by keeping it safe from algae build-up, oils, foul weather hazards such as high winds and dock contact. Our Lift's unique design means **your boat's weight is carried almost entirely by the Lift itself.** The dock carries only a minor tongue weight (similar to most trailers) which means that very little stress is placed on the dock itself. Adjustable mounting brackets allow the OZARK Boat Lift® to fit into virtually any size or shape slip.

Built to exceed and outlast

Our frames are constructed of fully welded structural steel, painted with industrial enamel over high-solids rust-inhibiting primer, and available with either galvanized steel or molded ABS tanks. Featuring an adjustable cradle system, carpeted bunks with UV protection, built-in GFIC circuitry and only a single major moving part—the **OZARK Boat Lift® is virtually maintenance-free.**

Please visit our website for a complete model list.

METAL BUILDINGS AND SUPPLIES

Land-based Solutions for Over 30 Years

For over 30 years, we've been proud to offer metal building solutions guaranteed to perform. Whether it's high-performing roofing and paneling products; money- and time-saving do-it-yourself steel building packages; or the insulation and accessories you need to complete your job—we've got you covered.

With more than 40 years of building experience and over three thousand project solutions, **we pride ourselves on listening to your needs,** reviewing your options, and ensuring your unique project gets exactly what it needs.

Whether you're after lifetime beauty and protection, do-it-yourself innovation, or energy efficiency—**our resources, experience and expertise will help ensure your vision becomes a successful reality.**
